

Bhargav Petla

AI Transformation Strategist - Network Science | SDA Bocconi, MBA

Mumbai, India

AI Transformation Strategist with 2+ years of experience translating ambiguous opportunities into structured, governable, ROI-driven systems. Led industry-agnostic engagements across strategy, consulting, and end-to-end implementation, partnering with CIOs, CTOs, and digital leaders to deliver production-grade agentic platforms, RAG pipelines, and AI operating models from concept to deployment.

WORK EXPERIENCE		
Network Science (2 Years 3 Months)	AI Solutioning Head Consulting	Apr 24 - Present
- Invented the Enterprise Brain (nsoffice.ai), a patented enterprise AI product that builds a System of Context across all business systems, unifying 100+ connectors to power multi-model chat, enterprise search, and autonomous agentic workflows. - Delivered 40+ enterprise customer use cases end-to-end across IT, BFSI, and professional services, achieving 8x ROI for clients, including an equity research agent, an ISO audit intelligence engine, and an AI-automated NOC. - Worked directly with client CTOs and leadership to rapid prototype, architect and deploy AI solutions mapped to their strategic priorities, while leading a team of 10 engineers and consultants. - Evaluated and benchmarked 150+ AI and open-source technologies against platform vision and capability requirements, driving performance optimization and informed build-vs-buy decisions.		
	AI Engagement Analyst	Apr 24 - Jul 25
- Led AI consulting engagements across India, Europe, and on-site in Dubai, guiding senior leadership on AI strategy while identifying 120+ high-impact use cases and 50+ integration workflows for enterprise-scale adoption. - Architected scalable agentic AI systems delivering 35+ production-ready agents and MCP-driven integrations, enabling 60%+ reduction in manual processes through A2A workflows for enterprise knowledge automation. - Designed AI transformation roadmaps for 5+ enterprises across multi-quarter horizons, built 50+ KPIs using a metric-backward approach, and defined AI OS-aligned use case portfolios to systematically quantify business value.		
Dell Technologies (3 Months)	FDP Intern - Finance	Apr 23 - Jun 23
- Worked on channel GTM strategy through financial analysis (Ratio, Price, and Productivity) using Excel and Power BI, and assessed productivity of the GBO sales channel by implementing an alert system. - Identified and developed 20+ KPIs to measure productivity using dashboards which surfaced best practices across regions (NA), promoting shared learning and data-driven insights.		

ACHIEVEMENTS & SKILLS	
Achievements	Bold Innovation Award (2026) - for redefining enterprise AI delivery. Employee of the Year (2025) & 5x Employee of the Month for sustained high-impact delivery. Trailblazer & Wolf Pack Awards - pioneering AI initiatives and elevating team performance. Inventor on Patent filed by Network Science Ltd. for NSOffice.ai
Skills	AI Solutioning: Agentic Systems, LLM Orchestration (LangGraph, CrewAI), Skills, MCP Tooling, RAG Pipelines, Memory Architectures (Mem0), Vector DBs, Evaluation & Guardrails. Delivery & Communication: BRDs, Solution Blueprints, RFP Response, Executive Storytelling, Stakeholder Alignment, Workshop Facilitation. Programming & Development: Python, Node.js, C, React, SQL; API Integration (REST, Microsoft Graph), Workflow Automation (n8n, Claude code), cloud (AWS, GCP). Languages: English, Telugu, Hindi, Japanese (Elementary).

ACADEMIC QUALIFICATIONS

Year	Qualification	Institute	Percentage
2024	MBA - Strategy and Analytics	SDA Bocconi School of Management, Italy	88.36%
2022	B.Tech/B.S - Computer Science	Indian Institute of Science E & R, India	81.60%
2018	Class XII	Sri Chaitanya Junior College	96.40%
2016	Class X	Dr KKR High School, India	97.00%
